

Indian Conference on Life Cycle Management (ILCM) 2017

9-10 October 2017, New Delhi

About ILCM

ILCM has established itself as one of the most sought after events in South Asia on Life Cycle approaches. It brings together Indian and International LCA communities with stakeholders from Indian government, industry, and academia to explore the applicability of Life Cycle Thinking (LCT) in enabling transition towards a truly sustainable economy. The underlying objective is to enable capacity building, networking and peer-to-peer learning.

The sixth edition of ILCM has a special focus on Sustainable Development Goals (SDGs) and on India-specific challenges (e.g. energy security, urban waste management, sanitation) and how Life Cycle knowledge adds value to sustainability content for the post-2015 era.

Who should attend

- Policy Makers
- Business Leaders
- Managers
- Consultants
- Academicians
- Researchers

Why attend

- Access ILCM's global network to engage with scientific community and sustainability leaders
- Learn to set and manage science-based goals using the power of Life Cycle Thinking
- Stand out as a leader in demonstrating commitment to UN Sustainable Development Goals
- Establish new and lasting collaborations with potential clients and partners
- Gain cutting edge knowledge on methodology and good practices in LCA space
- Network with stakeholders and decision-makers actively implementing Life Cycle approaches
